**The Challenge**

Fully maximizing your return on investment for threat intelligence can be a difficult and time consuming process. Disparate data schemas segment your data into bins which are often too broad or narrow in scope to effectively automate generation of security alerts that are necessary in order to trigger actionable security response workflows.

Having threat intelligence is only one part of the equation. One must also have broad contextual awareness of events, actions, and assets to ensure practical use of threat intelligence, to ensure maximum accuracy and visibility.

**Solution Benefits**

R-Scope's rich metadata provides the information about your network and assets that is necessary in order to fully leverage threat intelligence.

Be prepared for the new generation of indicators of compromise. Easily compare and contrast metadata specific to indicators such as user-agent, certificate, ciphers, and more.

Fully automated, real time generation of R-Scope metadata and ingestion of FireEye TAP. Reduce false positives and increase confidence and criticality of alerts.

**Reservoir Labs R-Scope Solution Overview**

R-Scope® leverages Bro to deliver real-time network visibility, situational awareness, and event detection at the speed of today’s business. Our enterprise-ready appliances seamlessly integrate with your IT operations, equipping your teams with easy-to-use tools to defend against rapidly evolving cyber threats.

The FireEye® Threat Analytics Platform (TAP) is a cloud based solution that enables security teams to identify and effectively respond to cyber threats by layering enterprise generated event data with real-time threat intelligence from FireEye.

Combining R-Scope's metadata with FireEye TAP provides the security team with high fidelity alerts and introduces new ways of analyzing and cross-referencing your existing logs to identify and remediate threats faster.
FireEye protects the most valuable assets in the world from today’s cyber attackers. Our combination of technology, intelligence, and expertise—reinforced with an aggressive incident response team—helps eliminate the impact of breaches. FireEye has over 4,000 customers across 67 countries, including more than 650 of the Forbes Global 2000.

Reservoir Labs is a technology and solutions company headquartered in New York City that’s earned the trust and respect of commercial and government clients as well as top-tier researchers around the globe. Our team of experts develop novel technologies to address the advanced security needs created by an evolving threat landscape.
